isn't nearly  
the more  
a great  
~~not~~  
by far  
slightly

deal more populated  
the tallest  
it melts  
faster  
as green as  
~~as cold as~~

The Arctic and Antarctic are poles apart! The Arctic is <sup>1</sup> ..... *not as cold as* ..... the Antarctic, mostly due to differences in height. The Antarctic is <sup>2</sup> ..... continent on Earth with an average height of 2,300 m! Because of its climate, Antarctica <sup>3</sup> ..... the north: only two flowering plants grow there, compared to 900 in the Arctic. What about people? Well the Arctic is <sup>4</sup> ..... : 4 million inhabitants, compared to Antarctica's 45,000 summer visitors. And in the race to the Poles, who reached them first? In the north it was either Frederick Cook in 1908 or Robert Peary in 1909. They were <sup>5</sup> ..... than Roald Amundsen, who arrived in Antarctica in 1911. The Arctic is in fact just a sheet of ice and <sup>6</sup> ....., the less heat gets reflected, so the planet warms. Scientists are very worried about this.

### 1

- 2 far colder
- 3 a bit colder
- 4 by far
- 5 nearly

### 2

- 2 than
- 3 almost
- 4 worse
- 5 longer
- 6 great
- 7 nearly

### 3

- 2 A
- 3 E
- 4 G
- 5 C
- 6 D

Not needed: B

### 4
